Profile

I'm a 3rd-year undergraduate student currently studying Web Design and Development and I am seeking an entry-level position in the front end sector. During my degree, I've developed excellent time management due to balancing my university workload while working at McDonald's. I proactively started a monthly internal employee presentation, which was recognised by the area manager and then rolled out region-wide. I've also demonstrated I can work in a team and a fast-paced environment, as I've been on the production line whilst the store has broken numerous records. I'm looking to start off my web career where I can show my passion for web development and learn new technologies along the way.

Key Skills

In my degree, I've learnt the fundamentals of **HTML5**, **CSS3** and **JavaScript**. I've used these languages to turn a design into a website with an API integrated. I've built a CMS with the **PHP** framework **Laravel** and the database management system **MySQL**. The system was created through **BDD** testing and after each test had passed I used **Version Control** to push it to the repository. Additionally, I've used the task runner **Gulp** to watch and format the **SASS** files automatically. I've run **Usability Tests** with user's on a website and usability tests by myself, which included **Performance** and **Accessibility** testing. Furthermore, I've conducted data analysis on web server logs through **Python** to identify issues users may be having on a website.

Education

Edge Hill University   *September 2017 – July 2020*

BSc (Hons) Web Design & Development - Projected First Class Classification

- Implemented a high fidelity prototype into a website
- Created an interactive vending machine and connect four-game
- Designed and built a questionnaire system
- Conducted a series of usability tests with users and without
- Data Analysis on web server logs files
- Participated in a Milexa Group web challenge

The City of Liverpool College   *September 2013 - July 2015*

Event Management - Merit

- Created a flyer for the Sefton Palm House wedding fair
- Front of house for R Charity Christmas carol concert

Maricourt Catholic High School

<div align="right">September 2008 - July 2013</div>

- 9 Passed GCSEs including Maths & English

Experience

McDonalds Switch Island

<div align="right">August 2016 – Present</div>

Crew Member

- Cook and prepare the food
- Take orders, payments and service of food to the customers
- Internal communications assistant for the store
- Been awarded Employee of the Month 3 times

Interests and Hobbies

- I go to the gym on a regular basis and like to challenge myself in following a programme
- I have taught myself how to DJ and have too taught my friends
- I like taking coding courses and then implementing the features I've learnt by mocking up websites found on the web
